

Cleaning and Maintenance Instructions

To ensure the safety and normal use of our products, regular cleaning and maintenance are essential. Here are some tips of cleaning and maintenance

- Cleaning is allowed when the charging cable is not connected to the vehicle.
- It must be ensured that no current flows at all.
- Clean the charging gun and dirty contacts with a dry cloth.
- Do not use aggressive cleaning agents, water, or steam jet cleaners.
- Do not immerse the product in liquids.
- Clean at least once a month and check the condition of the cable.
- At least once a month, regularly inspect the vehicle charging connector for damage and contamination.
